Front-end Developer | Aspiring Blockchain Developer

Results-driven and motivated B.Tech (CSE) graduate with a passion for software development and a strong foundation in computer science. Proficient in multiple programming languages, frameworks, and technologies. Skilled in problem-solving and building scalable web applications. Committed to continuous learning and staying updated with the latest industry trends.

Blockchain (Learning)

- Exploring blockchain development, including smart contract development and decentralized applications DApps.
- Actively learning Solidity and Web3.js for Ethereum blockchain development.
- Passionate about contributing to the blockchain community and expanding skills in this emerging field.

Technical Skills

Languages	: C, C++, Java, HTML ,CSS , JavaScript,Solidity
Blockchain Plat-forms	: Ethereum
Frameworks	: ReactJS
Libraries	: Bootstrap
Dev Tools	: Linux, Visual Studio Code, Git, Github

Education

Bachelor of Technology in CSE	**7.9 CGPA**
Institute of Engineering and Science ,IPS Academy	*July 2019 – June 2023*
Higher Secondary Education	**60.4%**
Central Board of Secondary Education	*Year–2019*
Secondary Education	**76%**
Central Board of Secondary Education	*Year–2017*

Projects

NewsDay Website — Source Code

- It is a news website which provides a daily news updates through **API**.
- The project was developed using **React** and the website was designed with a responsive layout, ensuring optimal user experience across various devices and screen sizes.
- **API Integration:** Integrated APIs to fetch and display news articles dynamically,dynamic content rendering, where news articles were dynamically displayed based on user interactions.
- **React Router** for smooth navigation between different sections or pages within the news website.

Portfolio Website — Source Code

- It is a website which i made during my learning phase.
- HTML,CSS and JavaScript

Decentralized Voting Application (In Development) — Source Code

- Designing and developing a decentralized voting application on the Ethereum blockchain using Solidity and Web3.js.
- Enabling secure and transparent voting processes, with a focus on user-friendly and efficient design.
- Collaborating with the blockchain community and open-source contributors to enhance the project.

Note Making Website — Source Code

- It is a simple website that stores user notes on the cloud. ReactJs, NodeJs, ExpressJs, MongoDb, JWT token, bcrypt, validator

COURSEWORK SUBJECTS

- Data Structure and Algorithms
- Object Oriented Programming

ACHIEVEMENTS

- Solved **600+** problems on Leetcode Platform.
- Earned the prestigious **Annual Badge** in 2022 on Leetcode Platfrom

PERSONAL SKILLS

- Ability to analyze complex problems, break them down into manageable components, and develop effective solutions
- Strong problem-solving skills to identify issues, brainstorm solutions, and implement them efficiently.
- Demonstrated leadership skills, including taking initiative, decision-making, and motivating others.
- Ability to quickly adapt to new technologies, programming languages, and methodologies in a fast-paced and evolving industry.
- Enthusiasm for learning and keeping up-to-date with the latest advancements in the field of computer science.
